December 22, 2009

To Whom It May Concern,

I have worked with American Infrastructure for over two years in my capacity as Site Project Executive at Andrews AFB for the AMC East Housing Project, where AI is under subcontract for all site work to include E&S, earthworks, underground utilities, and all roadwork respectively.

While at Andrews, AI has successfully maintained all E&S measures while working hand in hand with MDE and the base environmental department which has led to minimal deficiencies as well as set an example for others to mimic. They have also completed four new housing areas with an impeccable safety record and zero lost time injuries. With that said, AI has staffed the project with competent company personal which required minimal time for proper access to the base per the Andrews security force regulations.

I am confident that American Infrastructure could provide the same service and commitment to any project. If I can be of any further assistance or provide you with any further information, please do not hesitate to contact me.

Sincerely,

Mike Shenle  
Site Project Executive
